Twitter LinkedIn YouTube Facebook Email Lissamphibians. By the dawn of the Mesozoic Era, which followed the Paleozoic, only lissamphibians and one other group (trematosaur) survived. The last trematosaur disappeared in the late Mesozoic, 120 Ma. But paleontologists had overlooked one clade. On page 687 of this issue, Daza *et al.* (1) introduce an unusual fossil of the obscure and apparently extinct albanerpetontids.
